MOLDOVA

15.04.2019 Investigators of the Drug Enforcement Administration (INI), together with the Criminal Prosecution Officers (DGUP) and the Prosecutor's Office (PCCOCS) stopped activities of an organized criminal group specializing in smuggling, production and marketing of synthetic drugs (especially alpha-PVP). As a result of special investigative measures, a drug production laboratory located in the Yalovenky district, where drug precursors smuggled out of Ukraine were found, was dismantled. In the house of suspects, drugs were found and seized in especially large amounts in the amount of about 500 thousand lei (28 thousand US dollars). Operations of the criminal group were based on drug trafficking through electronic communications applications. The suspects created three online stores that attracted consumers and potential buyers, placed advertisements indicating the type and quantity of drugs available, as well as the region in which they can be picked up. Drugs were hidden in caches. It was established that drug dealers managed to place more than 9 thousand packages of drugs of different weights in the range from 0.5 to 50 g worth over 10 million lei (over 561 thousand US dollars). The Prosecutor's Office obtained evidence of laundering of proceeds from the sale of drugs through the purchase of property — two BMW X5 cars and one apartment in Chisinau worth about 50,000 euros. Five people were detained, including one woman.
